# What is Sliddev?

Sliddev is a slide maker and accompanying presentation tool designed for developers. It consists of the following features:

-  **Text-based** - focus on the content with Markdown, and apply styles later
-  **Themable** - themes can be shared and used as npm packages
-  **Developer Friendly** - code highlighting, live coding with autocompletion
-  **Interactive** - embedding Vue components to enhance your slides
-  **Recording** - built-in recording and camera view
-  **Portable** - export to PDF, PPTX, PNGs, or even a hostable SPA
-  **Hackable** - virtually anything that's possible on a webpage is possible in Sliddev

import { computed, ref } from 'vue'

const count = ref(0)
const doubled = computed(() => count.value * 2)

doubled.value = 2
    Cannot assign to 'value' because it is a read-only

# Components

You can use Vue components directly inside your slides.

```
<Tweet id="1390115482657726468" />
```

We have provided a few built-in components like `<Tweet/>` and `<Youtube/>` that you can use directly. Adding your own custom components is also super easy.

```
<Counter :count="10" />
```

# Themes

Slidev comes with powerful theming support. Themes can provide styles, layouts, components, or even configurations for tools. Switch between themes on a per-slide basis with just **one change** in your frontmatter:

```
---  
theme: default  
---
```

```
---  
theme: serif  
---
```

# Animations

Animations are powered by [@vueuse/motion](#).

```
